Experience

Reg-x-Innovations, Pune— Frontend Developer(Intern)

June 2024 - Present

- Built responsive and dynamic user interfaces using **React.js**, integrating APIs for real-time data and optimizing state management with **React Context API**.
- Styled applications using **Bootstrap** and **CSS**, ensuring visual consistency and a smooth user experience.

TSL Consulting, Pune— Frontend Developer(Intern)

May 2023 - June 2023

- Developed a static landing page for TSL using **HTML**, **CSS**, and **JavaScript**, leveraging **Bootstrap** for responsive layout and modern styling
- Implemented interactive features with **JavaScript** to enhance functionality, ensuring a polished and user-friendly interface.

Projects

Weather App - Frontend Project

- Used Open weather api to fetch local weather
- User can input their location or browser location is selected
- It includes current temperature, humidity and wind speed.
- I used react-toastify library for showing appropriate messages.

[Demo Link](#)

E-commerce App - Frontend Project

- I used React, TailwindCSS, react-router with an attractive UI.
- I used local JSON objects for showing products.

[Demo Link](#)

Todo App - Frontend Project

- I used React, tailwindCSS, local-storage, react-router-dom with an attractive UI.
- Features: Can list out future todo's, able to see past todo's.
